## Introducing: The 4<sup>th</sup> Grade Class

Sylvaine Gabriel, the fourth grade teacher, has worked for MOHI for 14 years. He had a deep connection to the mission since it began in the front yard of his father's house.

**Pierreson:** The school being connected to the church is the best part to him. "What we learn in church also applies to here in school, and it's a blessing. Our class sponsors have done a really big thing for us!"

**Dieury:** He loves the school for its tough rules, good teachers, and pretty yard and buildings. Dieury also expressed his gratitude for their sponsors. "I pray that God would bless them more and more so that they can continue to help us and help others, too."

**Cheno:** "I like coming to school here because they make us follow the rules, and everything is clean and beautiful. I wish we had more space though, so we could play outside during recess."

**Dina:** She appreciates that their teacher, Maitre Sylvaine, never gets tired of working with them. He is always ready with good advice for his students.

**Lucmann:** He loves being able to learn about computers.

Expressing what they didn't like about the school, the students did things like wipe their hands on the wall or jump on the benches. Pierrson said that he wishes that the students would learn to keep the school pretty. The class was also united in their desire to have a basketball court at the school. They want to thank their sponsors for helping them have such a great school, and they pray for God's blessing to be more and more evident in their lives.

## News From Haiti

- ❖ Graduation is coming up June 12<sup>th</sup> in Thozin and June 13<sup>th</sup> in St. Etienne followed by the national exams for our 6<sup>th</sup> and 9<sup>th</sup> graders and the final two years of high school students. Please keep our students in prayer as they complete these milestones in their education.
- ❖ The Edmes are booking their itinerary for August and September of this year. They hope to visit southern FL, NC, TN, OK, OH, and New England. Their time in the States is very limited, so if you would like to have them speak to your group, please contact Renee soon because their schedule fills up fast. (Renee@mohintl.org.)
- ❖ In addition to our 20kw generator, we now have a solar array with a bank of 24 batteries. We welded frames for the solar panels and now have them mounted on the roof. Full time electricity is in our future!
- ❖ Both Junior Dimanche, who works in maintenance, and Voltaire Sanon, our school director, were married this month. We were thrilled to be able to celebrate with them!

Hope...the beginning of change

## Teams of the Month

Another team from Bless Back Worldwide (Charlotte, NC) visited this month. Their busy team of 20 divided their time among medical concerns, preschool activities, soccer instruction, and village ministry. We were thrilled to have the team passing out bags of toothbrushes and toothpaste to the students after their instructions. These will be kept at the school so that students can brush their teeth after lunch. This will ensure that they brush at least once a day. The Bless Back team also accompanied Leah Fuller to St. Etienne with the mobile medical clinic for its inaugural trip. While they were down here, the team gathered with pastors and the family to dedicate the newest house that they funded. The people of Haiti have been truly blessed by their generosity.

Bob and Sally Heier brought us much joy with their visit. Sally was able to help Leah with the mobile medical clinic in St. Etienne and saw patients with her for the whole week. Bob helped us streamline our mobile medical clinic supplies and medications.

Pastor Kevin's son Micah, along with Pastor Paul Berube, arrived toward the end of the month with a team from Nashua Christian Academy (NCA) and Grace Fellowship Church in NH. They worked with Help4Haiti, and the students were paired with MOHI students for some one-on-one time. The team led worship for one of our evening services, and Pastor Paul gave a message for the nation that was broadcasted on our radio station. The team passed out soap to the students and even introduced some of the computer club kids to the wonderful world of robotics.
